P7650A/B/U
DIFFERENTIAL PRESSURE SENSORS

APPLICATION

The P7650 sensor can measure either air pressure or velocity. Measuring air velocity requires the use of the P7650L velocity pick-up probe. The P7650 is available in three installation configurations: duct, panel or universal. Duct and panel models have two pressure and velocity options: 0–1” WC / 0–3,000 FPM or 1–10” WC / 3,000–6,000 FPM with four field-selectable sub-ranges.

The universal model comes in one pressure/velocity range: 0–10” WC / 0–7,000 FPM with seven field-selectable sub-ranges. All variants are available with and without display. The P7650 has an IP65/NEMA 4 environmental rating and a 5-year limited warranty.
