

T775 Electronic Standalone Controller

Honeywell

WE BUILT IT, SO YOU DON'T HAVE TO

No Assembly Required

Built-In Control

With The T775, You'll Know You Have Exactly What You Need, Because All The Features Are Self-Contained

Some controllers require you to piece together separate modules to get the control features you want, and those added relays can, well, add up. So can the added LCD display, an added transformer module and more. The Honeywell T775 Electronic Standalone Controller puts an end to add-on costs. All the features you need for a variety of applications are built right into the T775, including the LCD display. You won't have to worry about having the right modules in stock or needing to piece them together. The T775 has it all.

It's All Inside

Easy-To-Use Graphical Interface — Operating the new T775 is as easy as operating your cell phone. The easy-to-use, intuitive programming will save you time on every job.

Internal Time Clock Scheduler — The Setback and Disable Output options, controlled by the built-in scheduler or digital input, will help save energy during unoccupied times and give you more control of the equipment without needing to purchase an additional time clock.

Up To Two Independent Modulating Outputs — Each output can be individually configured for 0-10 Vdc, 2-10 Vdc, 4-20 mA or Series 90, so a single device can handle many field requirements to save you time selecting the right control for the job.

NEMA 4X Enclosure Option — Certain models are offered with NEMA 4X enclosures to protect them from water and corrosion. They can be installed in animal confinement areas, green houses, washdown areas, swimming pools and other similar locations, giving you the control you need for harsh locations.

Modulating High Or Low Limit Control — If you need to protect your coil from freezing or your equipment from overheating, models offering this feature give you the ability to adjust your control temperature at sensor A to protect equipment at sensor B. You get consistent control while still protecting your equipment.

Optional Configurable Integral And Derivative Times — Standard on every device, this feature delivers pinpoint control. PI or PID control on modulating outputs is set up by default to behave just like the previous T775 Series 1000, but now you can adjust reaction times and behavior, giving you more control.

Reset Models With Simplified Setup — Reset programming has never been easier. Simply enter the high and low control temperatures and the corresponding high and low outdoor temperatures, and you're done. As your outside temperature gets colder, the setpoint temperature automatically adjusts to save energy.

Configurable Minimum Off Time — If needed, setting a minimum off time can protect equipment and reduce the need for a separate time delay device.

Sensor Calibration — Calibrate input sensors up to +/-10° F. This can be used to compensate for resistance drops in wire leads, to offset the input temperature for sensor location and more.

Fewer Models — Fourteen T775 models replace 38 Series 1000 models, so you'll reduce inventory and eliminate the headache of trying to choose the right model.

Special Models

Several T775 models are designed to ensure your control needs can still be met with a single unit for special applications.

Universal Model To Control Pressure, Humidity Or Temperature — The T775U Universal model has an easy setup for configuring control of pressure or humidity with a 0-5Vdc, 0-10 Vdc or 4-20 mA input. Control humidity with % RH displayed, CO2 with ppm displayed, or control pressure with in. w.c., psi, Pa, or kPa displayed. Outputs include two modulating and two relay outputs that can each have their own setpoint. The T775U even offers the ability to reset the output based on outdoor temperature — handy when you need to reduce window condensation when setting humidity levels. With the T775U, you'll enjoy complete versatility in a single control that gives you the freedom to do what the job requires.

Special Sequencing Model For Staging Up To 12 Relays With Up To Two Setpoints — The sequencer model has four stages, plus you can add up to two optional 4-stage expansion relay modules for 8- or 12-stage operation. The flexible setup allows you to configure these stages for heating, cooling or both. Because sequencer models operate up to 12 stages, you can control multiple low-mass boilers, chillers, electric heat and other equipment from a single controller.

Special Boiler Model — The T775 boiler model offers features including dedicated pump output, staging for up to 12 relays, digital output alarm, pump exercise, pump pre-purge and post-purge, warm weather shut-down, built-in scheduler, displayed run time, equal run time, first-on, first-off and more. With a single control, you can handle multi-boiler applications. The T775 boiler model can be used on chillers as well.

T775 Electronic Remote Temperature Controllers

Models for Standard Applications

Product Number	Description	Replaces	Relay Outputs	Analog Outputs 4-20 mA, 0-10 Vdc, 2-10 Vdc, & Series 90	Floating Output ¹	Sensor Inputs Available	# Sensors Included ²
T775A2009/U	Standard	T775A1001	1 SPDT			1	1
T775B2016/U	Standard-NEMA 4X		2 SPDT		1	2	1
T775B2032/U	Standard	T775A1019, T775B1000	2 SPDT		1	2	1
T775B2024/U	Standard-NEMA 4X	T775C1009, T775D1008	4 SPDT		2	2	1
T775B2040/U	Standard	T775A1027, T775A1035, T775B1018, T775B1026, T775B1040	4 SPDT		2	2	1
T775M2006/U	Modulating		None	2		2	1
T775M2022/U	Modulating-NEMA 4X		2 SPDT	2		2	1
T775M2048/U	Modulating	T775E1015, T775E1023, T775E1056, T775E1064, T775E1098	2 SPDT	2		2	1
T775M2014/U	Modulating-NEMA 4X	T775G1005, T775G1013, T775G1021, T775G1039	4 SPDT	2		2	1
T775M2030/U	Modulating	T775E1114, T775F1022, T775F1055, T775F1089	4 SPDT	2		2	1
T775R2035/U	Reset option	T775J1001, T775J1076	2 SPDT		1	2	2
T775R2043/U	Reset option	T775J1019, T775J1027, T775J1035	None	2		2	2
T775R2027/U	Reset option	T775J1043, T775J1050, T775J1068	2 SPDT	2		2	2
T775R2001/U	Reset option		4 SPDT		2	2	2
T775R2019/U	Reset option		4 SPDT	2		2	2

¹ One floating output eliminates two relay outputs.

² 50021579-001 included with non-NEMA 4X models, and T775-SENS-WR included with NEMA 4X models.

Models for Special Applications

Product Number	Description	Replaces	Relay Outputs	Analog Outputs 4-20 mA, 0-10 Vdc, 2-10 Vdc, & Series 90	Digital Output	Dedicated Pump Output	Sensor Inputs Available	# Sensors Included	Expandable ¹	Output Reset
T775P2003/U ²	Special boiler with reset		4 SPDT		1	•	3	3	•	•
T775L2007/U	Stage sequencer with reset option		4 SPDT ³				2	1	•	•
T775U2006/U	Universal — humidity, pressure, etc.	H775A1006, H775A1022, H775A1048, H775A1063, H775B1005, H775C1004, H775D1003, H775E1002	2 SPDT	2			2 ⁴			•
T775U2016/U	Universal - Control to sensor A (universal input) and Sensor B (temp) independently.		2 SPDT	2			2 ⁴			•
T775S2008/U	Relay expansion module		4 SPDT							

¹ 4 or 8 more relays possible with T775S2008 relay expansion module(s).

² Includes dedicated pump output, equal run time, pump pre-purge and post-purge, WWSD and more.

³ Up to 2 independent non-sequenced relays are also available.

⁴ First input configurable for temperature 0-5Vdc, 0-10 Vdc, or 4-20 mA; second input is configurable for temperature only.

Make The Switch

Whether you're replacing an older control or working on a new project, Honeywell T775 controls are a smart choice.

T775 Electronic Remote Temperature Controllers

Compatible Components

	Part Number	Description	Application	Use With
Temperature	50021579-001/U	Standard temperature sensor for indoor applications	Monitoring temperature of return air, discharge air and mixed air	All T775 Series 2000 models
	T775-SENS-WR/U	Water-resistant sensor with 5-ft. leads		
	T775-SENS-WT/U	Water-tight sensor with 6-ft. leads	Outdoor air for reset	
	T775-SENS-OAT/U	Outdoor air temperature sensor		
	C7031D2003/U	5-in. immersion sensor (comes with immersion well, 50001774-001)	Hot or chilled water	
	C7031J2009/U	12-in. duct averaging sensor with four elements	Duct discharge air	
	C7046D1008/U	8-in. duct probe with mounting flange	Duct discharge air mounts on flat duct or plenum surface	
	C7100D1001/U	12-in. fast response, duct averaging sensor with flange	Averaging duct discharge air for use in troubleshooting	
	C7130B100/U9	Room mount sensor	Wall mount air temperature sensor	
Humidity	H7625A/B/U	Humidity transmitter, 2% RH accuracy, wall mount or duct mount	Humidity	T775U2006, T775U2016
	H7635A/B/C/U	Humidity transmitter, 3% RH accuracy, wall mount, duct mount or outdoor mounting		
	H7655A/U	Humidity transmitter, 5% RH accuracy, wall mount		
	H7655B/U	Humidity transmitter, 5% RH accuracy, duct mount		
Pressure	P7640A/U	Differential pressure transmitter, 0-1.0, 0-0.5, 0-0.25, or 0-0.1 in. w.c., uni- or bi-directional, panel mount, with display	Duct, room and building static pressure, clean rooms, hospitals, fume hoods and computer rooms	T775U2006, T775U2016
	P7640U/U	Differential pressure transmitter, 0-10, 0-5, 0-2.5, 0-1, 0-0.5, 0-0.25, or 0-0.1 in. w.c., uni- or bi-directional, panel or duct mount, with and without display		
CO ₂	C7232/U	Non-Dispersive Infrared (NDIR) carbon dioxide sensor, 0-2,000 ppm adjustable, 0/2-10 Vdc or 0/4 to 20 mA adjustable, one adjustable SPST relay output, wall or duct mount, LCD option and Honeywell logo option	Ventilation and air conditioning systems to control the amount of fresh outdoor air supplied to maintain acceptable levels of CO ₂ in the space (demand control ventilation)	
	C7632/U	Non-Dispersive Infrared (NDIR) carbon dioxide sensor, fixed 0-2,000 ppm, fixed 0-10 Vdc output, wall or duct mount and Honeywell logo option
