

An Enhanced Design With Proven Reliability

The Truth About Humidification Delivery

Many whole-house humidifier manufacturers list humidification capacity in gallons per day (GPD), or the amount of moisture they can deliver in a 24 hour period. But how do you know which ones really work and if a home is getting enough moisture?

Comparing humidification delivery is a great place to start.

Typically, the GPD claim is based on a home's heating equipment running 100 percent of the time, for 24 hours a day at 120°F. Since most humidifiers only work when equipment is running (and no equipment runs full-time), they rarely deliver more than 1 gallon of moisture for every three gallons that they claim. Plus, for every one gallon of water that is evaporated, three gallons go down the drain.

TrueSTEAM offers the most reliable, efficient levels of moisture because of its near 1:1 humidification delivery rate, regardless of equipment operation.

TYPE OF HUMIDIFIER	HUMIDIFICATION DELIVERY RATE	
Honeywell TrueSTEAM™*	(1:1)	Claim: 12, Delivery: 12, Consumption: 2
Fan-Powered Humidifiers**	(1:3)	Claim: 18, Delivery: 6, Consumption: 72
Bypass Humidifiers**	(1:4)	Claim: 12, Delivery: 3, Consumption: 48

* Does not include auto-flush cycle.

** Humidification delivery rate not applicable for Honeywell TrueEASE advanced bypass or TrueEASE fan powered humidifiers that feature water savings technology.

The New TrueSTEAM™ — the next generation of humidification systems from Honeywell.

TrueSTEAM™ Humidification

Designed For Today's Equipment.

The world of heating and cooling equipment is vastly different today than it was even a few years ago, with the trend towards high-efficiency, variable speed, dual-fuel and heat pump systems. Because of how these systems operate, yesterday's humidifiers often fail to deliver the humidification that your homeowners

desire. The redesigned TrueSTEAM provides the solution, a humidification system that operates independently from the equipment.

Here's Where TrueSTEAM™ Delivers

Breakthrough Technology

TrueSTEAM takes the best features from current steam humidifiers with their efficiency, performance and decreased water consumption, and combines it with the ease of installation, reliability and value of flow-through humidifiers. TrueSTEAM is different from others because it operates independent of equipment operation. With its near 1:1 humidification delivery rate, TrueSTEAM delivers the right amount of humidification to keep your customers satisfied.

HumidiPRO™ Set It and Forget It

HumidiPRO, a digital humidistat, works with TrueEASE so there's no need to adjust humidity settings when the weather changes. HumidiPRO makes those changes automatically to reduce condensation or frost on the homeowner's windows. However, to manually add a boost of moisture, the Humidity Boost feature can increase the pre-set relative humidity by 5 or 10 percent. HumidiPRO is included in all TrueEASE packaging.

Limitless Installation Opportunities

TrueSTEAM can be remotely mounted up to 20 feet away from the system with remote-mount kit, making humidification possible in homes where it was once thought impossible.

TrueSTEAM™ Humidification System

Simplified Mounting – Requires only a 1-3/4" cut into ductwork and mounts on a separate, lightweight bracket (included) for accurate leveling.

Application Flexibility – Can be remotely mounted up to 20 feet from the system.

Easy Maintenance – No tools required to access and clean tank, which can save time on your annual contract service calls.

Independent Operation – Provides humidity independent of equipment operation, allowing homeowners to reach their desired humidity setpoints regardless of air temperature.

Incoloy 600 Heating Element – A material designed to limit mineral build-up.

Quick Connect – Integrated plumbing allows you to connect the plumbing in a single step by attaching the hose to the quick connect gasket.

HumidiPRO™ – Automatic humidification control with advanced window protection.

NEW! Fail-Safe Water Sensing – Multiple sensors (two low, two high and one ideal) sit in a separate compartment to accurately monitor water levels.

NEW! Common-Sense Interface – LED lights indicate when system is running or needs service. Lights also provide feedback to the installer during installation.

Patented* Condensate Collect Dome and Nozzle – Prevents water from condensing out of the unit, delivering only true steam into the airflow.

Universal Wiring – Moving control to the Prestige™ HD via the wireless adaptor eliminates need to wire TrueSTEAM into the HVAC equipment.

Clean, Professional Installation – Push terminals for easy wiring (no screwdriver required) are routed through an interior harness so no wires are exposed.

Dual-Action Water Valve – Solenoid design automatically fills and drains when needed to inhibit debris build-up in the tank.

* Patent pending

Exclusive Support – Honeywell supports you with a 5-year warranty, a toll-free hotline (1-800-814-9452), local experts, training, free literature, Contractor PRO™ rewards and more.

TrueSTEAM™ Humidification System	
Part Number	Description
HM512A2000	12-GPD TrueSTEAM™ with H6062 digital control with window protection
HM509A2000	9-GPD TrueSTEAM™ with H6062 digital control with window protection
HM506A2000	6-GPD TrueSTEAM™ with H6062 digital control with window protection
TrueSTEAM™ Humidification System Kits	
Part Number	Description
YHM506HRO1	TrueSTEAM 6-gallon with H6062 digital humidity control. Includes 6-Gallon TrueSTEAM™Humidifier and RO Filter Kit
YHM509HRO1	TrueSTEAM 9-gallon with H6062 digital humidity control. Includes 9-Gallon TrueSTEAM™Humidifier and RO Filter Kit
YHM512HRO1	TrueSTEAM 12-gallon with H6062 digital humidity control. Includes 12-Gallon TrueSTEAM™Humidifier and RO Filter Kit

Accessories	
Part Number	Description
C7189R1004	Wireless Indoor Sensor
C7089R1013	Wireless Outdoor Sensor
REM5000R1001	Portable Comfort Control
THM6000R1002	RedLINK™ Internet Gateway
H6062A1000	Digital Humidity Control with window protection
THM4000R1000	Wireless Adapter
50024917-001	10' remote-mount kit
50024917-002	20' remote-mount kit
50045947-001	RO Water Filter with Storage Tank
50045947-002	RO Water Filter with Storage Tank and Water Pump
50046086-001	Filter Replacement Kit Includes #1 and #2 Filters

Control Options

Choose the humidity control option that is right for your customer. TrueSTEAM humidification systems can be controlled using:

All-New VisionPRO and Redesigned Prestige IAQ Wireless Controls - Plug and Play

Finally - universal installation regardless of equipment brand or type. Because TrueSTEAM is now wireless, there's no need to decipher complex wiring from the humidifier to the furnace

board. Simply connect TrueSTEAM to the Wireless Adapter and press 'Connect'. The adaptor communicates wirelessly with Prestige to control humidity, fan airflow and temperature. Adding a RedLINK Enabled Internet Gateway allows your customer to control the Prestige, humidifier and alerts remotely from their computer, tablet or smart phone device.

Configuration Options:

All options can be configured during installer setup.

Automatic Flushing Cycle Options:

After 10, 20 or 30 hours of operational humidifying time.

Auto End-Of-Season Shutdown Options:

Will empty tank after 48 hours of inactivity.

Service Timer Options:

Light indicator can blink to clean tank every 12 months.

The Importance of Testing Water Quality

The first step of selling and installing humidification systems is testing the home's water quality. The performance of any type of humidification system is dependent on the hardness of water that's being used to operate it. Typically, the harder the water, the more scale and sediment build up inside the humidifier – which can affect overall operation. This is why we highly recommend testing water hardness prior to installing TrueSTEAM. For applications where it makes sense, consider a Honeywell Reverse Osmosis Water Filtration System, which work to reduce the hardness and/or increase the water pressure in the home.

Bundling to Make a Bundle

TrueSTEAM is just one of many indoor air quality products offered by Honeywell. Telling homeowners about the benefits of other Honeywell products like whole-house air cleaners, humidifiers, dehumidifiers and ventilation systems will not only offer you more sales opportunities, but will offer the homeowner a safer, more energy-efficient environment. Honeywell, the leader in home comfort and indoor air quality.

Wireless TrueSTEAM is also compatible with conventionally wired thermostats.
