

# peak efficiency

**Learning about a better way to control combustion efficiency can mean savings for you!** The Honeywell ControlLinks™ linkage-less fuel air ratio control is a micro-processor based control, which helps to provide maximum efficiency for your equipment. ControlLinks uses unique air and fuel curves, separate light-off points and different minimum and maximum modulation points. This results in more accurate control, energy efficiency and savings for you. Learn more about ControlLinks at [customer.honeywell.com](http://customer.honeywell.com) and start saving today.
