Reduce callbacks with reliable Honeywell Heat Sequencers. Few customer callbacks are more annoying than, “There’s cold air blowing out of my furnace.” Honeywell R24 Series Heat Sequencers eliminate those nuisance callbacks by controlling the operation of the electric strip heat and/or blower fan in heat pumps and electric furnaces. Not only does the R24 Series Heat Sequencer prevent the electrical system from being overloaded, it also eliminates the burst of cold air that comes before the unit starts producing warm air. They also prevent your truck from being overloaded by replacing more than 40 competitive models. For reliable service plus reduced inventory, choose Honeywell R24 Series Heat Sequencers.
R24 Series Heat Sequencers

The Smart, Dependable Choice
You don’t need to stock dozens of heat sequencers. Cover nearly all applications with the Honeywell R24 Series. They replace more than 40 competitive models and work perfectly in units made by major HVAC manufacturers. Honeywell R24 Series Heat Sequencers are built with the famous Honeywell reliability for long service life.

Easy Installation
Honeywell R24 Series Heat Sequencers are solid-state positive temperature coefficient (PTC) heaters that mount in any position. Quick-connect terminals speed up installation. In addition to the fact that the R24 Series Heat Sequencers replace a wide range of models, installation is also simplified because you don’t have to spend time looking for an exact model replacement. Honeywell R24 Series Heat Sequencers have you covered.

Applications
Sequencing of heater banks in:
- Electric furnaces
- Baseboard heaters
- Duct heaters
- Suspension heaters
- Recreational vehicle blower and element control
- Heat pump blower and heating element control
- Motor speed switching in air conditioning (high speed)/heating systems (low speed) where a single set of contacts handle combination motor and heater element loading in the heating function
- Control circuits requiring definite sequence of operation on both start up and shut down

Key Features
- Solid-state PTC Heaters
- Quick-connect terminals
- Shock and vibration resistant
- Mounts in any position
- Contact ratings — to 25 Amps at 120 or 240 Volts, and 12.5 Amps at 480 Volts
- Full-load rating auxiliary contacts
- Standard operating ambience between - 40° F (-40.0° C) and 165° F (73.8° C)
- UL approved; CSA/CUR approval pending
