

**Accuracy And Simplicity
Come Together**

Ready For Action

Bring on just about any temperature control scenario and the new TR20 family of direct-wired wall modules is ready to handle it. Compatible with many Honeywell controllers, including Spyder™, TR20 wall modules provide the accurate temperature readings and reliability you've come to expect from Honeywell sensors.

BUILT-IN FEATURES

There's a TR20 wall module just right for your application.

The family features include:

- Space sensor, 20K ohms NTC on most models
- Sleek design with appealing white color
- Operating range 45° to 99° F (7° to 37° C)

ADAPTABLE

The TR22 and TR23 wall modules are engineered with additional optional features so you can select the right wall module for the demands of the application.

Model options include:

- Temperature only
- Temperature and humidity
- Three selectable setpoint dials in Fahrenheit, Celsius and Relative (- to +)
- Override button with LED
- LON® jack
- 3-position or 5-position fan switch

COMPATIBLE

Support for many Honeywell controllers comes standard with the TR20 family.

FAMILY	MODELS
Excel	600, 500, 100 and 80
Excel 10	W7750, W7751 ^a , W7752 and W7753
Spyder	PUL6438, PVL6436A and PVL6438N

^aNot compatible with the W7751A,C,E,G controllers.

GOOD BECOMES GREAT

The TR20 family of wall modules is a replacement for the T7770 product line. For situations where you'd like to use a T7770 model, reach instead for a TR20 module for extended functionality and the same reliable performance.
