

The quick action of Honeywell WEBS-Ax™ Video helps you act quickly, too. Because Honeywell WEBS-Ax Video is built on the Niagara<sup>AX</sup> Framework<sup>®</sup>, it integrates seamlessly into facility management systems. So when a critical security event occurs, Honeywell WEBS-Ax Video instantly feeds you live video to ensure a fast response to any alarm.

You'll get the improved security of video surveillance integrated with your building automation system, and you'll get it at a low entry-level cost.

# Integrated Video Surveillance

If you've thought that video is a security solution separate from your building automation system, it's time to take a look at Honeywell WEBs-AX Video. It supports a bi-directional alarming interface that allows event-driven communication between video and Niagara-based applications for true integration and a fast response. Plus, you'll be able to manage WEBs-AX Video from the same interface, so there's no need for a separate workstation.

## COMPREHENSIVE SOLUTION

From schools and government buildings to retail stores and offices, if it's a building, it needs a security solution. Honeywell WEBs-AX Video provides the benefits of seamless video surveillance integration at a cost lower than other systems, all while providing comprehensive service.

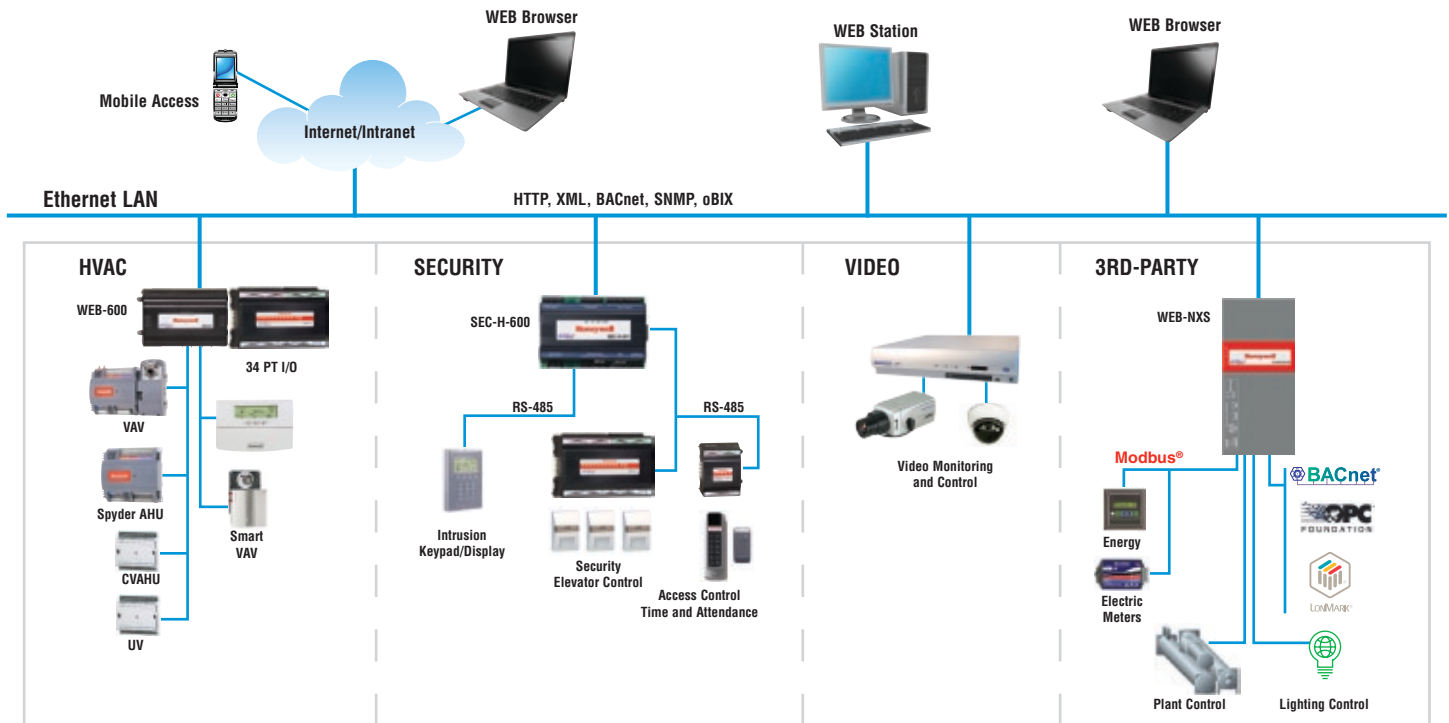

- Consistent presentation reduces training and the need for multiple operators
- Customizable to best meet the user's needs and preferences
- Event-initiated recording provides live verification of critical events and material for later review
- Integrated video alarm management
- Can also function as a standalone security application
